

## REMOTE MONITORING OPTIONS

### AS/400 INTERFACE KIT

Interfaces the UPS with the AS/400 operating system to achieve an orderly system shutdown (other cable kits on application).

#### Description

Interface kit for AS/400 (cable kit)

### NETMAN

The NetMan network agents monitor and control UPS on the supported network. They are ideal when integrating UPS into medium and large scale networks, and provide high level reliability and flexibility when managing multi-server shutdowns, UPS information and remote commands:

- SNMP with RFC 1628 and proprietary MIB for management with NMS type HP OpenView or CA Unicenter TNG
- HTTP
- TELNET

Compatible with PowerShield<sup>2</sup> software.

#### Description

External network agent Ethernet NetMan 101 (box version)

Network agent with Ethernet NetMan 102 card (slot version)

External network agent Token ring NetMan 203 (box version)

### USB CONVERTER

Allows connection of the UPS to MacOS computers or PCs running Windows 98 and 2000.

#### Description

USB Converter

### MULTIPLEXER

Provide multiple communication ports between a single UPS and several PCs and workstations, not connected to the same local area network or for security reasons used as proxy servers. Compatible with PowerShield<sup>2</sup> software.

#### Description

4 serial output Multiplexer for MasterDialog ERM and ERT series

5 serial output Multiplexer for all UPS series excluding MasterDialog ERM and ERT series

10 serial output Multiplexer for all UPS series excluding MasterDialog ERM and ERT series
